

Script : Windows PowerShell

Etape 1 :

Sélection Administrateur : Windows PowerShell

```
+ FullyQualifiedErrorId : CommandNotFoundException
```

Suggestion [3,General]: La commande registerdeskfr est introuvable, mais elle existe à l'emplacement actuel. Par défaut, Windows PowerShell ne charge aucune commande à partir de l'emplacement actuel. Si vous approuvez cette commande, tapez « .\registerdeskfr » à la place. Pour en savoir plus, voir "get-help about_Command_Precedence".

```
PS C:\teamtv> .\registerDeskFR.ps1
```
